Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 27, 2003 has been entered.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in the United Kingdom on 04/12/2000. It is noted, however, that applicant has not filed a certified copy of the priority application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-6 and 8-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 as amended sets forth that the

Art Unit: 3727

flexible loop has "a lower portion affixed to the tubular body portion, an upper portion that is attachable to the user, and a middle portion which remains flexible". The specification and drawings do not teach this arrangement. The specification merely sets forth a flexible loop attached to the tubular body portion which may be made of webbing. Newly submitted claim 8 sets forth "only one flexible loop". The specification and drawings do not provide support for this limitation.

5. Claims 1-6 and 8-13 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a flexible loop being attached to the tubular body portion, does not reasonably provide enablement for flexible loop having a lower portion affixed to the tubular body portion, an upper portion that is attachable to the user, and a middle portion which remains flexible as set forth in claim 1 and providing only one flexible loop attached to the tubular body portion as set forth in claim 8. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The specification does not teach an upper, lower and middle portion with the limitations set forth in claim 1 and does not provide support for only a single loop as set forth in claim 8.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3727

7. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Uyehara 4,662,552.

Uyehara teaches a tool holster comprising a rigid tubular body 30, a cutaway section 43, 43', 43", a flared upper edge 44, a notch 46, means for attachment 12 having a lower portion attached to the tubular body portion via base support 20, an upper portion supported on belt 12, and flexible straps 50, 51 forming a middle portion, and a pivot 24.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 8-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uyehara 4,662,552 in view of either Gross 5,386,932 or Dancyger et al. 5,497,921.

Uyehara as set forth above teaches a tool holster comprising all of the elements of applicants claimed invention except that the holder is attached by two flexible loops to a users belt instead of one as claimed. Both Gross and Dancyger teach belt mounted holders in which the holders are attached by a single flexible loop to the belt of a user. It would have been obvious to one of ordinary skill in the art to modify the invention of Uyehara to be attached to the belt of a user by a single flexible loop in the manner as taught by Gross and/or Dancyger since all of the above inventions teach art recognized equivalent means for attaching article holders to the belt of a user.

Response to Arguments

10. Applicant's arguments filed May 27, 2003 have been fully considered but they are not persuasive. In response to applicants argument directed to claim 1, the specification fails to provide support for the newly added limitations. As pointed out in the rejection above, Uyehara still meets the limitations of the claim.

Conclusion

11. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
